

**XT-A SINGLE** TABLE IN white/black

XA61-4

The XT-A SINGLE is a completely new type of luminaire that focuses on the adaptation to height-adjustable desks, bench workstations and partition walls.

The luminaire heads can be installed, fixed to the work surface and offer great advantages: optimum light values and perfect glare control at the work station (thanks to the luminaire maintaining an equal distance from the work surface), simplified lighting and luminaire planning, and removal of the need for a luminaire base.

XT-A SINGLE luminaires are equipped with our patented glare control system (OSA) and can be optionally supplemented with our patented swarm function CONNECT.

The luminaire received the iF Award 2018.

Design: Tobias Grau

### TECHNICAL SPECIFICATIONS

Lamp holder	LED
Light emission	20% direct / 80% indirect
Luminaire luminous flux	6000 lm
Color temperature	3500 K
Power consumption (maximum)	48 W
Colour rendering index (CRI)	>80
Rated voltage (range)	220-240 V / 120 V
Energy efficiency	A - A++
Dimmable	Yes
Type of Dimmer	Integrated pushbutton
